

2019 United Nations SDG pulse

Mining & resources sector

At the International Mining and Resources Conference (IMARC) in Melbourne this year, we introduced our Sustainability services to the sector and asked attendees: **Which 3 of the 17 UN Sustainable Development Goals (SDGs) are most relevant to your organisations' future success? These are our results.**

2019 Pulse

Keen to benchmark the priorities for people working across the global mining & resources sector in 2019, we worked closely with IMARC organisers to develop a live poll for delegates to vote through the conference app, with results also tallied at our exhibition stand.

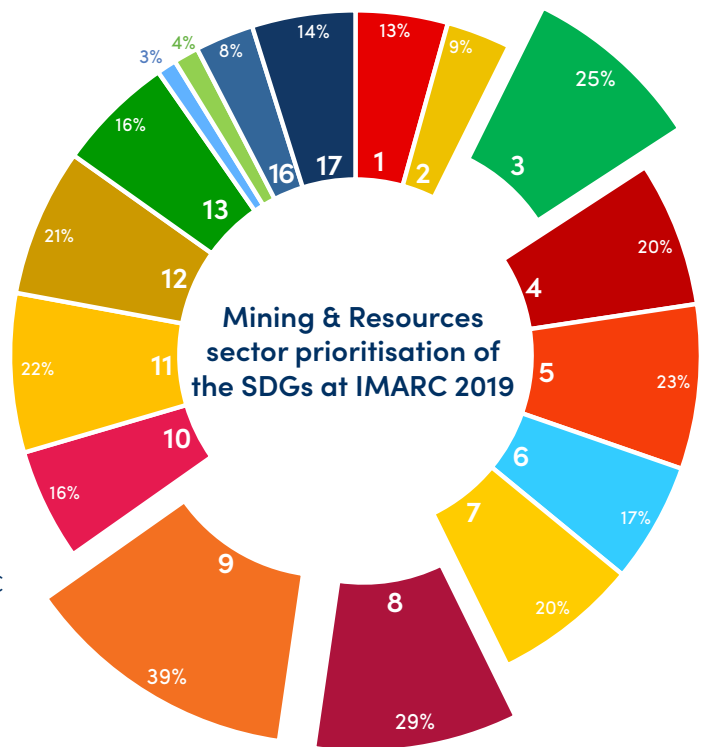

While the number one priority may not come as a surprise, many people were keen to expand their choices beyond three. In light of this and other insights, we include the nominated top 5 priorities here:

- GOAL 9: Industry, Innovation and Infrastructure
- GOAL 8: Decent Work and Economic Growth
- GOAL 3: Good Health and Well-Being
- GOAL 5: Gender Equality
- GOAL 11: Sustainable Cities and Communities

Social license and long term impact

There was unprecedented international attention on IMARC this year, with protestors and ensuing media putting a spotlight on the industry as a whole.

The theme of 'social license to operate' occupied the programme on day two with various sessions focused on issues that align to the SDGs overall. With this level of focus, there was great consensus that the adoption of sustainable practices will become increasingly crucial to the long-term success in of the industry.

Key issues facing Boards & Executive:

- Rising expectations of investors, customers, stakeholders
- Boards expected to provide ESG oversight & governance
- Tell the sustainability story or else someone else will
- Increasing pressure for appropriate disclosures
- Pressure to be able to measure and report on performance
- Director liabilities and penalties for poor governance over environmental matters e.g. climate risk disclosure
- Multiple emerging sustainability risks and liability scenarios.

SUSTAINABLE DEVELOPMENT GOALS

Wherever you are on your sustainability journey, we can assist.

NOT DOING

DO BETTER

DO MORE

Stage 1

Assessment & ambition

Interested in learning more about sustainability and what it means for your business

Stage 2

Implement & execute

Have commenced sustainability practices but would like to understand impacts and progress

Stage 3

Grow & expand

Well established sustainability practices, keen to explore global opportunities

Services to suit your needs

Implementation services

Energy, water, waste, communications, policy. We have the network and experience to deliver your targeted outcomes.

Managed services

If outcomes aren't enough, we can manage your assets against your goals. Continuous monitoring with SLAs. Energy, waste, water, communications.

Project services & joint ventures

Project solar, wind, geothermal. Waste reduction. JV based sustainability programs into your supply chain. Win/win outcomes. We thrive on JV / partnership models that deliver results.

Sustainability health check

Pulse check your organisation's sustainability practices. Get started quickly on outcome based improvement actions.

How can we get started?

Our advisers can work with you on the following:

- Insights & sharing best practice
- Leadership facilitation
- Targeted problems /opportunity areas
- Sustainability roadmap development
- Quick-win oriented healthchecks
- Energy audit & cost savings
- Strategic partnership
